EDUCATION

- Maharaja Agrasen Institute of Technology** Delhi, India
Bachelor of Technology (B.Tech) in Computer Science; GPA: 8.8 August 2019 - July 2023
Courses: Operating Systems, Database Management (DBMS), Computer Networks, Software Engineering, Data Structures and Algorithms.

EXPERIENCE

- TransUnion** Bengaluru, India
Software Developer 1 Dec 2023 - Current
 - Transitioned build automation from **Maven** to **Gradle**, improving efficiency and reducing build times.
 - Implemented a logging mechanism to capture and preserve **data processing job** statuses from Google Cloud, enabling **real-time visibility** and error reporting in the front-end for failed or stuck jobs.
 - Implemented a **dynamic schema** configuration interface, enabling users to define and customize data fields and entities through an intuitive frontend UI.
 - Deployed and managed cloud-based solutions **Google Cloud Platform(GCP)** for TransUnion's backend services.
 - Leverage **Redis Queue** to continuously update paths and perform pre-processing for efficient data pipeline execution.
 - Collaborated with **cross-functional teams** to improve **model-driven creation features**, integrating **big data processing** to improve the accuracy of estimating the reach of the campaign by **25%**.
 - Tech Used:** React.JS, Scala, PostgreSQL, Google Cloud, Redis, Git, Javascript, Jenkins, Java
- BarRaiser** Remote, Delhi
Frontend Developer Intern July 2023 - Nov 2023
 - Created a **keyword-triggered meeting scheduling system** that automatically creates meetings on Zoom, Google Meet, or Microsoft Teams when it detects keywords related to interviews.
 - Implemented **Google reCAPTCHA v3** functionality in a web application.
 - Developed a comprehensive portal for **free trial users** to use and test the product for some time.
 - Designed and executed an interactive onboarding experience for web application newcomers by harnessing **UserGuiding software**, enhancing user engagement and comprehension during the product tour.
 - Tech Used:** React.JS, Material UI, Javascript, LLM, Redux, CHATGPT API
- Frendy** Remote, India
Full Stack Developer Intern May 2022 - Aug 2022
 - Created and deployed digital business cards, resulting in a **25% increase in social media followers**.
 - Actively developed dynamic, responsive web interfaces using **JavaScript** frameworks for web applications.
 - Enhanced user experience by implementing the **lazy loading** feature on the company website.
 - Tech Used:** Vue.JS, Javascript, MongoDB, quasar

TECHNICAL SKILLS

- Languages:** Javascript, Java, Scala, Typescript
- Frameworks:** React, Nodejs, Express.js, Redux, Apache Spark, GraphQL, Next.js
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, BIGQUERY
- Tools:** IntelliJ IDEA, Docker, Git, Jenkins, JIRA, Postman, VS Code, Google Cloud Platform,
- Computer Fundamentals:** Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems, OOPS, Design Patterns, System Design, Software Engineering Principles

FREELANCING

- QuickParash:** [GitHub] [Link]
 - Design and build a user-friendly web application that allows patients to book appointments with healthcare professionals of various specialties, improving accessibility and convenience in healthcare services.
 - Successfully deployed the project, achieving over **3,000+ active live users**, demonstrating scalability and reliability.
 - Designed efficient search and filtering systems to connect users with healthcare providers based on location and expertise
- Tech Stack:** Next.js, Typescript, Node.js, Mongo dB, Express.js , Tailwind, Postman.

ACHIEVEMENTS

- Solved over **5,000 coding problems** across **Codeforces, Scaler, InterviewBit, LeetCode and GFG**.
- Got the **best performer award** in a quarter for 2 consecutive years.
- Ranked **Global 5,830** and **India 1,946** in **Google HashCode 2021**.
