## EDUCATION

---

- Maharaja Agrasen Institute of Technology** Delhi, India  
*Bachelor of Technology (B.Tech) in Computer Science; GPA: 8.8* *August 2019 - July 2023*

## EXPERIENCE

---

- TransUnion (CIBIL)** Bengaluru, India  
*Software Developer* *Dec 2023 - Current*
  - Designed and shipped an end-to-end **schema configuration platform** using **React.js**, **Java**, and **Node.js**, eliminating **~40% of manual engineering configuration requests**.
  - Built a full-stack **GCP job monitoring system** with **Node.js**, **PostgreSQL**, **BigQuery**, and a **React.js dashboard**, reducing average **incident detection time** from hours to under **10 minutes**.
  - Architected and maintained **50–60 Spark/Scala pipelines** and **Airflow DAGs** processing **3+ petabytes of data** on GCP, improving daily batch **pipeline reliability** and throughput.
  - Integrated an **LLM-based failure detection system** into **Airflow DAGs**, reducing **manual intervention** for pipeline failures by approximately **50%**.
  - Implemented **GCS data lifecycle policies** and automated purging workflows, reducing **cloud storage costs** by **~20%** and saving approximately **\$50,000 annually**.
  - Optimized **data pipelines**, increasing **campaign reach estimation accuracy** by **25%**.
- BarRaiser** Remote, Delhi  
*Frontend Developer Intern* *July 2023 - Nov 2023*
  - Built a **self-service onboarding portal** using **React.js** and **Node.js**, enabling **free-trial user activation** and supporting **product-led growth** without sales team involvement.
  - Engineered an automated **meeting scheduling system** that generated **Zoom**, **Google Meet**, and **Microsoft Teams** links from keyword triggers, eliminating **manual interview coordination** efforts.
  - Integrated **Google reCAPTCHA v3** across frontend and backend systems to eliminate **bot signups**; leveraged the **ChatGPT API** to deliver one of the platform's first **LLM-powered product features**.
- Frendy** Remote, India  
*Full Stack Developer Intern* *May 2022 - Aug 2022*
  - Built responsive **Vue.js** and **Quasar** interfaces backed by **MongoDB APIs**, contributing to a **25% increase in social media follower growth** through digital business card features.
  - Implemented **lazy loading**, improving **page load times** and **Core Web Vitals**.
  - Delivered **full-stack features** with end-to-end ownership across the **frontend**, **backend**, and **database layer**, strengthening system-wide understanding of **data flow** and service interactions.

## TECHNICAL SKILLS

---

- Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Redux, Tailwind CSS, Material UI
- Backend:** Node.js, Express.js, Java, Scala, GraphQL, REST APIs
- Databases:** PostgreSQL, MongoDB, BigQuery, Redis, MySQL, Firebase
- Cloud & DevOps:** Google Cloud Platform (Cloud Run, BigQuery, GCS, Pub/Sub), Docker, Jenkins, Git, Maven, Gradle

## PROJECTS

---

- QuickParamarsh:** [GitHub] [Link]
  - Architected the entire **full-stack platform** from scratch, designing **MongoDB schemas** for patients, doctors, appointments, and specialties, while implementing **conflict-safe concurrent appointment scheduling** in **Node.js**.
  - Implemented **JWT authentication**, **role-based access control**, **SSR with Next.js** for SEO, and **REST APIs** with geo-filtering and specialty-based ranking.
  - Scaled the platform to **3,000+ active users** with **zero reported downtime** post-launch; performed **index tuning** and **schema migrations** to maintain query performance as data volume grew.
  - Maintained **structured logging** across the **Node.js backend**, enabling observability into **API latency** and **error rates** in production environments.

## ACHIEVEMENTS

---

- Solved over **5,000 coding problems** across **Codeforces**, **Scaler**, **InterviewBit**, **LeetCode** and **GFG**.
- Got the **best performer award** in a quarter for 2 consecutive years.
- Ranked **Global 5,830** and **India 1,946** in **Google HashCode 2021**.
